I did mean Alan Cregan. But you are certainly welcome. You should coordinate with Janel. It's up to DOGGR who to include. I got an "out of office" reply from Alan Cregan for the rest of this week, so I am going to have to schedule the meeting and hope someone from the RWQCB is able to attend. Thanks!

Hi Michele,

Not sure if you meant Alan Cregan or Alan Walker, but please count us both in – Alan Walker and yours truly. Appreciate if you can send us an invite when the date/time gets finalized.

Thanks.

Jerry

Hi Janel,

Also, Alan, would you like to join the call?

Joel Coffman and I would prefer Tuesday 2/16, say 10am?

We can provide a call in number shortly. If you have any maps or documents describing the proposed aquifer exemption in the Fruitvale field that you can pass along to EPA in advance of the call, please do. As I mentioned in my note we have an application for an aquifer exemption for a portion of the Santa Margarita Formation in the field at the location of the Alon Bakersfield Refinery that is deficient, however we understand DOGGR is processing a much broader proposed exemption that may overlap and cover the same zone at the Alon Refinery as well as San Joaquin Refinery.

Thanks,

Michele

Michele,

I will be in Riverside most of this week. It would be great to have a discussion regarding the Fruitvale field. Are you available next week?

I am available on Tues, 2/16 anytime; Thurs, 2/18 anytime, or Fri, 2/19 anytime.

Please let me know which date and time is most convenient for you and a number to call into.

Thanks,

Janel Kay Chamberlain

Subject: Conference call to discuss Fruitvale Field Aquifer Exemption

Hello Janel,

My colleague and I, Joel Coffman would like to schedule a conference call with you to discuss any pending aquifer exemption proposals for the Fruitvale field. As you may know we have been coordinating with Central Valley RWQCB on several facilities in this area (Alon Bakersfield Refinery and San Joaquin Refinery – both injecting into the Santa Margarita Formation) and we would like to get an understanding of the Class II disposal operations in this formation/field. Would you kindly advise some convenient times in the next week or so? That would be much appreciated.

Sincerely,

Michele
